Hello Team,

 This is the documentation file of project *College Bus Management System (CBMS)* created by **Collaborative Labs Software Solutions**. The project is done using language: JAVA and database is MySQL. The following is the hardware & software requirements of CBMS.

Hardware Requirement
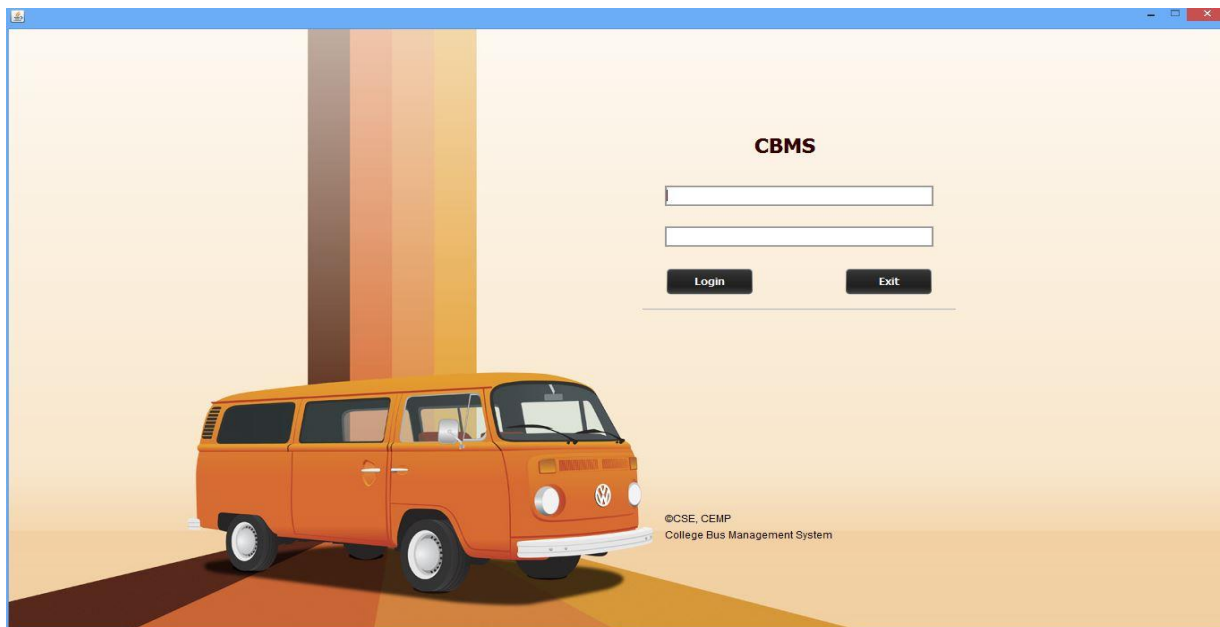

Processor: Intel Dual Core

RAM: 512MB

Software Requirement
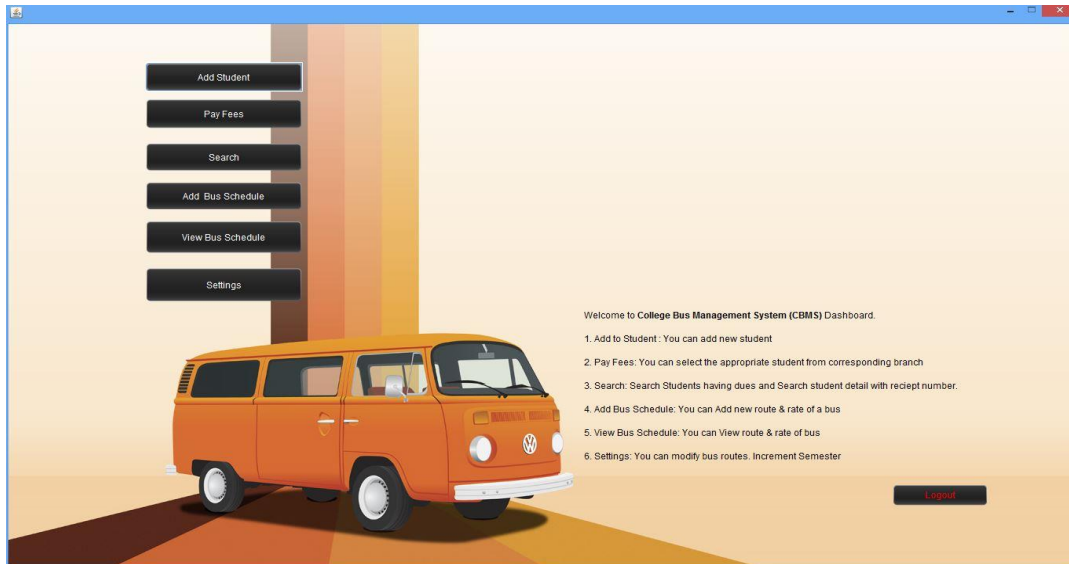

1. JAVA
2. MySQL

CBMS: UI Information

LOGIN

Login page contains two fields to enter: 1. UserName 2. Password

Default username and password is: admin, admin.

DASHBOARD

Details of Dashboard is listed in UI itself.

ADD STUDENT

Input StudentID, Student Name, Branch, Semester, Route No:, Bus Stop, Rate.

You cannot edit rate here. For editing and adding new routes, you need to go to Schedule page.

PAY FEES

Select Branch, Semester, StudentID.

Then details of that student will be loaded in the right section.

Type the fees to pay and press PAY button. After that you will get the receipt and print the receipt.
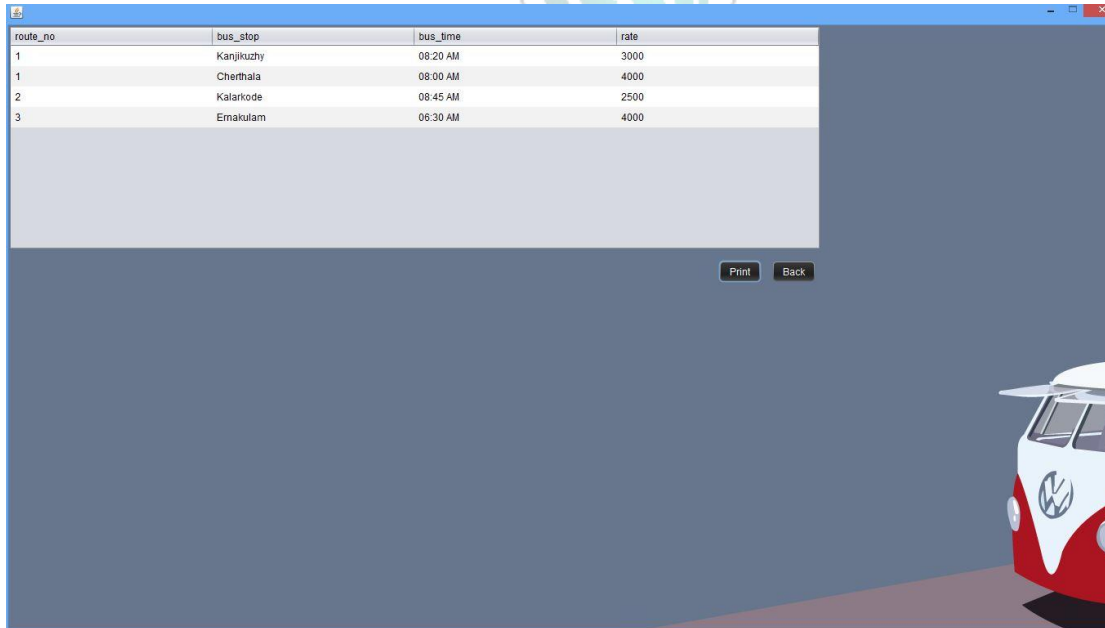

SEARCH

You can search students based on dues & based on receipt number.

ADD BUS SCHEDULE

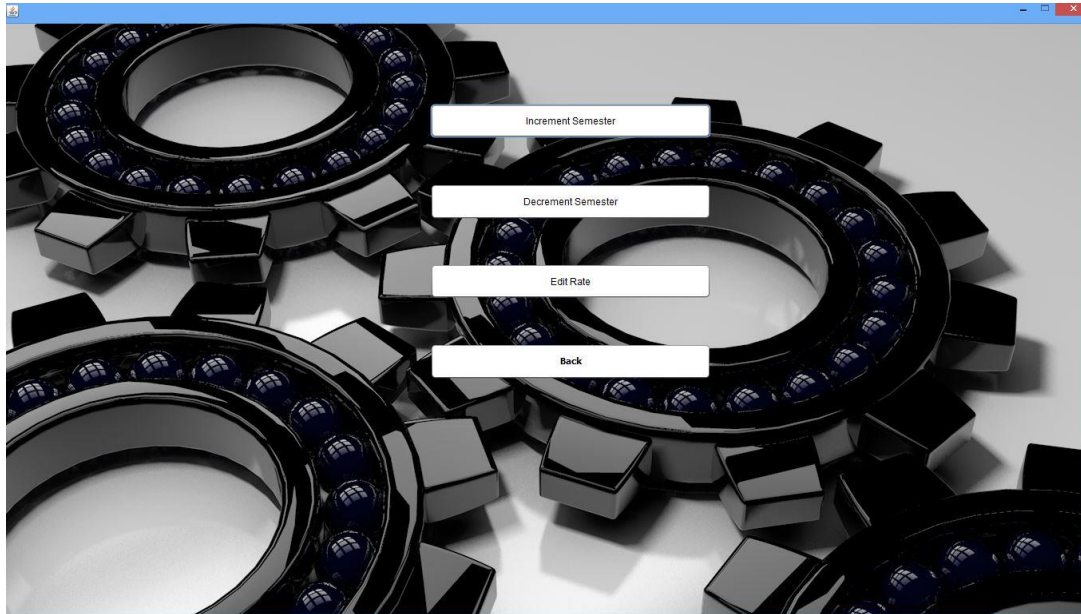

You can add bus route, bus stop, time, rate of a bus.

VIEW BUS SCHEDULE

You will get all the details of all routes and bus.

SETTINGS

Increment Semester: This button will increase the semester of all students. Click this button when new semester starts.

Decrement Semester: This button will decrease the semester of all students. Click this button if required. (Optional).

Edit Rate: You can edit rate of a particular route.

EDIT RATE

Select route number and bus stop, then you can edit the rate of that bus route.

Thanks & Regards
